

ALARM MANAGEMENT SYSTEM

An efficient and automatic way to manage your day-to-day, business critical, and safety alarms

Alarm Teldio's Alarm Management System (AMS) integrates to existing alarm infrastructure, applications and devices to automatically dispatch personal safety and business-critical alarms to Digital Mobile Radios (DMR) and other handheld devices.

AMS can integrate with a multitude of alarm panels and devices, allowing it to be a compatible solution for many organizations.

Teldio AMS integrations include:

Teldio AMS also works with Teldio Safety and GPS Tracking Solutions.
