

Teldio Edge Gateway Solutions

A highly customizable platform offering custom and pre-configured solutions

The Teldio Edge Gateway is a cost-effective, highly customizable hardware platform. It can be utilized to build a solution tailored to the exact need of our customers, as well as offering our customers a variety of pre-configured solutions.

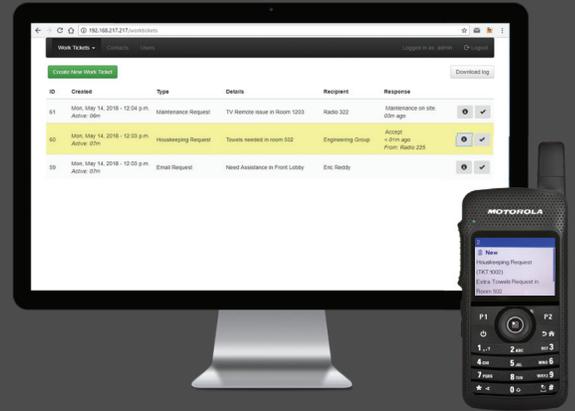

With the ability to work with a variety of inputs and outputs the Teldio Edge Gateway offers a plethora of possible custom solutions.

Teldio

Applications

The Teldio Edge Gateway applications include Alarm Management System (AMS), safety solutions such as Lone Worker (LW) and Man Down Notifier (MDN), Teldio Broadcast and the Radio Status Tracker.

The Teldio Edge Gateway also supports integration to Avigilon video systems, Teldio IoT Badge, Teldio Wireless/Wired Sensors, Teldio Wireless Panic Buttons, and Weather Alerting.

Custom Solutions

Whether for you or a customer, Teldio can help you find the solution that best fits the situation.

Teldio's team prides itself on delivering solutions that help customers solve real operational challenges, offering a variety of products which can be combined to create unique solutions. However, when customers cannot find exactly what they need, Teldio's custom solutions help bridge the gap.

SOURCES

Building Management & Machinery Alarms
(SMTP, Serial ASCII, SCADA and more)

Panic Alarms

OUTPUTS

Send alarm notifications to multiple devices simultaneously via

- MOTOTRBOs: Text, Audio Alert, Smart Ticket
- Smartphones: SMS & Audio Alert
- Emails
- Relay outputs
- And more

Teldio was founded in early 2008 with a primary focus on two-way radio applications for MOTOTRBO devices and is an Authorized Application Provider of MOTOTRBO. Teldio has evolved to be a systems integrator and applications developer delivering solutions targeted at improving operational efficiency, employee safety & cost reduction for our customers.
