

LOCATION TRACKING & FLEET MANAGEMENT

Track and manage vehicles and personnel indoors and outdoors

With Teldio's location tracking solution, TruFleet, the location of vehicles that are equipped with MOTOTRBO radios and personnel that carry MOTOTRBO radios can be tracked to improve productivity and efficiency.

Features

Web based, easy to access user interface.

Built-in geofencing, bookmarks, route replays and detailed, customizable reports.

Sprite tracking option enables granular location updates and records events such as when a school bus door opens or when a plow attached to the vehicle is used.

Integrations

Integrate with routing software, outage management systems, or subscribe to a live feed of locations.

Pair TruFleet with a safety solution to include location management in an emergency message.

Use TruFleet with Teldio's Alarm Management System to send out location based alerts to a variety of devices and systems, incl. Avigilon cameras.

“Teldio's TruFleet solution was quick to install and it's easy to use, giving us peace of mind knowing that students and staff are safe – while utilizing infrastructure we already had in place.”
